

# MADITRACE

## OVERVIEW

Why MaDiTraCe?

"MaDiTraCe - Material and digital traceability for the certification of critical raw materials" is a three-year research project funded by Horizon Europe with the goal of developing digital and geo-based approaches for Environment, Social and Governance (ESG) standards for critical raw materials (CRM) and to integrate them with a generic certification scheme for CRMs.

## RELATED NEWS

Keep informed!

The European Critical Raw Materials Act aims to strengthen EU's critical raw materials capacities along all stages of the value chain. It also aims to **increase our resilience by reducing dependencies**, increasing preparedness and promoting supply chain sustainability and circularity. It has set out four pillars to achieve this.

[MORE INFO HERE](#)

The EU's plan to oblige companies to police their value chains for human rights and environmental standards has been met with fierce opposition from most industry sectors. However, for the mining industry, the new due diligence directive could prove to be a competitive advantage.
